

Sharpening Luthiers Tools

Luthiers use a variety of tools that include hand planes, chisels, carving tools, scrapers, and some specialty small hand tools. The standard tools can be sharpened with the standard jigs available for the Lap-Sharp. Some of the specialty tools are tool small to fit the standard jigs, so adapters can be used to accommodate the sharpening of these tools.

Self Squaring Tool Clamp with adapter to hold a small plane iron.
